#### Abstract

**SmartCampus: AI-Powered Issue Management and Resolution System** is an intelligent platform that simplifies campus complaint management. It uses AI to automatically classify issues, detect duplicate complaints, determine priority, and recommend the appropriate department. Features such as **“I’m Also Affected,” SLA-based escalation, notifications, and analytics** help reduce duplicate reports and improve resolution time. The project follows Adaptive Software Engineering practices using Agile, CI/CD, DevOps, and MLOps technologies to provide a scalable and efficient campus issue management solution.
